

# HKE Solutions, LLC. Partners with Clean Republic

- HKE Solutions, LLC. has partnered with Clean Republic, a producer of Disinfectant and Sanitizer out of Boulder, CO.
- Clean Republic's Disinfectant and Sanitizer kills 99.99% of bacteria and viruses, yet is made using only 3 ingredients – salt, water, and electricity. Their products are free from harsh chemicals and toxic fumes. The salt, water, and electricity combination produces hypochlorous acid (HOCl), which has been proven effective in the fight against COVID-19, per the EPA.
- Clean Republic's Disinfectant and Sanitizer is safe for all areas of a facility. From Back of the House (rated food safe), Front of the House, and Restrooms to many aspects of Curbside Pick-Up & Delivery, their product is easy to use, safe, and effective.
- Many dispensing options are available. Clean Republic's product offering of Pocket Size Hand Cleanser (great for retail sales), Touchless Hand Dispensers, Spray Bottles, and Emist applications will cover most of your cleaning needs.
- Complimentary Marketing Kits are available to end users for advertising a clean and safe facility.
- List of Kill Claims, Safety Data Sheets, and EPA Certifications available upon request.
- Contact Glenn Yerke, HKE Solutions Sales Associate, at 303-552-4679 or [gyerke@hkesolutionsllc.com](mailto:gyerke@hkesolutionsllc.com) for more details.
